Technical Skills

- HTML
- Web Design
- CSS
- Javascript
- Node.js
- React.js
- Git
- MongoDB
- MySQL
- Resume Writing
-

Certifications

Free Code Camp

- ☐ Full Stack Certification
- ☐ Responsive Web Design
- ☐ Javascript Algorithms and Data Structures
- ☐ Front End Libraries
- ☐ Data Visualization
- ☐ APIs and Microservices
- ☐ Information Security and Quality Assurance

Selected Projects

Personal Library Catalog Back End

A Node.js server presenting a REST API to track and inventory books in a relational database. Also delivers a web-app front end. Made without Express, only dependencies are Node and MySQL for Node. Deployed on Heroku.

Skills demonstrated

Javascript   Node.js   REST APIs   MySQL,

Personal Library Catalog Front End

http://m42catalog.herokuapp.com/

A Single Page Application written with React.js. Allows user to lookup books by keyword, filter the results, and add new books and locations to keep them in to the database on the back end.

Skills demonstrated

HTML   CSS   Javascript   React.js   REST APIs

Anonymous Message Board

https://m42-messageboard.glitch.me

Wrote a REST API, database logic, and functional tests for the back end. Redesigned the front end to be an actual message board rather than just an API testing tool.

Skills demonstrated

HTML   CSS   Javascript   Repsonsive Web Design   Node.js, Express.js   automated function testing   REST API UX Design
